

REMARKS

Claim 1 has been amended to include nylon filler; support for the amendment is found in the examples and original claim 4. The presence of the nylon contributes to the noise resistance, solvent resistance, and abrasion resistance of the claimed composition.

Nylon is not disclosed in any of the prior art references cited.

Therefore, there is no motivation in any of the art to form a composition as now claimed. Applicants urge the Examiner to the conclusion that the claims are now in condition for allowance and respectfully request same.
